ASSIGNMENT

V.S.B. Engineering College,Karur

Electronics And Communication Engineering

Title: SmartFarmer - IoT Enabled Smart Farming Application

Name: Abinaya.R

Problem:

Build a python code by assuming temperature and humidity values and write a condition to continuously ringing alarm in case of High temperature.

Code:

```
temperature = int(input("Enter temperature value: "))

humidity = int(input("Enter humidity value in %: "))

if(temperature>=38):

a = int(input("Number of times to alert: "))

for i in range(a):

print("Alert !!, alarming")

else:

print("The temperature is Moderate")
```

OUTPUT:

Output:

```
Enter temperature value: 40
Enter humidity value in %: 50
Number of tims to alert: 7
Alert !!, alarming
Alert !!, alarming
Alert !!, alarming
Alert !!, alarming
Alert !!, alarming
Alert !!, alarming
Alert !!, alarming

...Program finished with exit code 0
Press ENTER to exit console.
```

```
Enter humidity value in %: 79
The temperature is Moderate

...Program finished with exit code 0
Press ENTER to exit console.
```
